RESULTS GUARANTEED!

Your Body, only better

What is VASER liposelection?

How does it differ from traditional liposuction?

VASER Liposelection is a minimally invasive procedure that precisely and efficiently removes unwanted body fat. An alternative to the harsh techniques of traditional liposuction, VASER Liposelection uses state-of-the-art ultrasound technology designed to gently reshape your body. At Venus Medical Beauty, VASER is performed under local anaesthesia, avoiding the unnecessary risks of a general anaesthetic. The VASER ultrasound technology liquefies fat instantly while conserving surrounding tissues such as blood vessels and nerves. The result is a smooth result and much less bruising and swelling compared to traditional liposuction.

Is VASER Liposelection right for me?

If you are frustrated by stubborn areas of fat despite diet and exercise, VASER Liposelection can provide a solution. You may be suitable if you are healthy and seeking a fast, low-pain solution for body contouring of areas such as tummy, love-handles, back, inner and outer thighs, inner knees, arms and male chest. During a consultation, our doctor can discuss whether you are suitable and assist you with your decision about potential areas for contouring, anticipated results and the recovery process.

What happens during VASER Liposelection?

1. The area to be reshaped is filled with a special saline solution that numbs the area so you feel no discomfort. This is done through tiny incisions (4mm) which heal very quickly.
2. A small probe is passed into the fat and sound energy breaks up the fat, leaving surrounding tissues relatively undamaged. The fat is liquefied instantly.
3. The liquefied fat is removed through gentle suction.
4. A snug compression garment is worn afterwards to ensure a smooth result and comfort.
5. You can go home usually an hour or two after the procedure.

Who performs the procedure?

Venus Medical Beauty is the first clinic in Ireland to perform VASER and one of the only clinics in the UK and Ireland offering the procedure. Our surgeon delivers beautiful results safely and consistently. Dr Prendergast is also the only VASER instructor in Ireland and was selected by Sound Surgical Technologies, the US company that developed VASER, to train doctors all over the world.

When do I see results?

Most people will see results as soon as 1 week after the procedure! In fact we **GUARANTEE** you will see an improvement in the fatty deposits at 4 weeks following the procedure. If you don't we'll give you your money back!* Pain and swelling are usually minimal afterwards and you will be able to return to your normal activities usually within a couple of days. It is important to remember that results continue to improve for up to 3 months after VASER Liposelection, so you can enjoy a better contour as time goes by.

It's your body, be Selective...

The difference is amazing.

	<i>Traditional Liposuction</i>	<i>Laser Lipolysis e.g. SmartLipo</i>	<i>VASER Liposelection</i>
Go home same day	No	Yes	Yes
Traumatic to tissues	Yes	No	No
Anaesthetic	Usually general	Local	Local
Can treat more than 1 area at a time	Yes	No	Yes
Can treat large areas	Yes	No	Yes
Recovery time	Weeks	1-2 days	1-2 days
Swelling & bruising	Can be extensive & take weeks to resolve	Minimal	Minimal
Skin tightening effect	None	Minimal	Good
Fat removed during procedure	Yes	No - left in the body	Yes
Results seen	Take 2-4 months. Can be dramatic	Subtle results - takes 2-3months	Results seen in days - improve further over 2-3 months. Can be dramatic

“I had VASER Liposelection on Friday and was back to work on Monday.”

Seeing is believing

Before and after images are of actual VASER Liposelection patients who have consented to our use of their photographs. Results vary from patient to patient.
