WHAT IS SKINSURANCE?

Skinsurance is a doctor-devised programme of advanced skin rejuvenation that restores and maintains skin health and beauty by targeting all aspects of skin aging in every level of the skin. Skinsurance is a first in medical skincare, designed to tighten, lift, smooth, clear, and brighten the skin on your face and neck, all for the same low monthly fee.

The procedures chosen for the Skinsurance programme are advanced cosmetic procedures using the latest and most effective lasers and techniques for skin health restoration and rejuvenation. The Skinsurance programme transforms skin as follows:

- Removes dry, dull weathered skin precisely and safely
- Removes uneven brown pigmentation and blemishes
- Targets facial redness, broken vessels and acne rosacea
- Stimulates and heats collagen in the mid and deep layers of skin
- Improves metabolism and blood flow between skin cells
- Delivers vitamins, minerals, hyaluronic acid and retinoids directly into the skin

By combining the procedures in the Skinsurance programme, our doctors target all the elements of aging skin to safely tighten, tone, clear, smooth, stimulate and hydrate the skin. Whether you are in your twenties, thirties, forties, fifties or sixties, we guarantee that after just a few months on the programme, you will have:

- **Reduced fine lines and wrinkling around the eyes and mouth**
- **Tighter skin and improved definition of the jawline and neck**
- **A clearer complexion**
- **Brighter, glowing skin**
- **Smooth skin and tighter pores**

WHY SKINSURANCE?

Skinsurance is a unique medical skincare programme. No other programme offers such a comprehensive range of procedures in a medical clinic at such an affordable price. For one initial payment and a low monthly fee, you can experience the most effective and safe cosmetic skin care procedures currently available and transform your skin with minimal or no downtime.

Conventional skin care using creams and lotions has limited efficacy. Although they feel good and give a temporary glow to skin, the real benefits of topical products are limited. Creams do not resurface the skin and produce the dramatic results achievable using fractional CO2 lasers. They do not stimulate collagen like radiofrequency and intense pulse light technologies such as RF skin tightening and IPL. Creams do not penetrate the skin barrier to deliver their powerful ingredients as easily as the Mesoglow procedure, and are no use in treating broken vessels and redness. Enjoy all the benefits of fractional CO2, RF skin tightening, IPL, Mesoglow and more, with Skinsurance.

All of the individual procedures in the Skinsurance programme are medical cosmetic procedures that produce results. These procedures each cost from €300 - €1500. The key to antiaging skincare is maintenance. In order to keep your skin beautiful, fresh, and youthful, procedures must be repeated regularly over time. We offer a unique programme that allows you to enjoy all of these procedures, every month, every year, for a low initial payment and monthly fee. We hope this incredibly good value will encourage you to take this opportunity to look and feel your best as the years go by.

Fractional CO2 laser skin resurfacing

The latest and most advanced form of skin resurfacing, the fractional CO2 laser scans across the face and precisely removes the outermost layer of skin, whilst heating the deeper layers. Tiny "fractions" of skin are left untouched by the laser to allow a quicker recovery than traditional laser resurfacing. Fractional CO2 laser skin resurfacing removes sun damage, uneven pigmentation, and fine lines. The result is smoother, clearer and brighter skin. The treatment can be tailored to treat even deep wrinkles and lines and tighten skin, allowing an incredible transformation in just days.

Laser genesis

The laser genesis procedure smooths skin texture, tightens pores, reduces fine lines and reduces facial redness. A powerful NdYAG laser passes over the face delivering thousands of pulses into the superficial layer of skin. This pleasant procedure has been termed the "laser facial" as it can be performed at regular intervals throughout the year to optimize its antiaging effects on skin.

IPL photorejuvenation

One of the most popular cosmetic treatments in the world, intense pulsed light (IPL) treatments improve skin colour by selectively targeting and clearing brown and red pigment in the top layers of skin.

How Skinsurance works

1. FREE consultation and 3D skin imaging to check skin health and measure wrinkles, roughness, sundamage and redness
2. Tailored programme for skin health restoration is provided, including schedule of skin resurfacing, tightening, stimulating, hydrating and clearing based on your skin requirements
3. Enjoy the benefits of advanced procedures performed as frequently as once every two weeks if you wish, all year long, ensuring the best possible skin rejuvenation and maintenance
4. Your skin is assessed at each visit and your Skinsurance programme is tailored to optimise results over time. There is no fee per procedure no matter what Skinsurance treatment you receive—you just pay the same low monthly fee!

*Terms, conditions and financial policy

Fees for the Skinsurance programme apply to face and neck treatments only. Other areas (eg. décolletage, hands) are considered a separate programme. The fee consists of one initial payment of €1500, and €169 per month starting the month after the first payment. Fees are collected either by standing order or by one annual payment. The initial fee of €1500 is payable to enter the Skinsurance programme regardless of previous treatment history. Upon commencement of the Skinsurance programme, a commitment of at least one year is required. After one year, if at any stage the programme is discontinued by the client, a further fee of €1500 is payable to recommence the Skinsurance programme. A maximum of one procedure every two weeks is allowable, subject to availability and suitability. Treatments are selected based on patient suitability and will not be performed if contraindicated or refused by medical staff. Skinsurance treatments must be booked in advance and are performed subject to appointment availability. Cancellations must be made at least 48 hours before a scheduled appointment; failure to do so will result in a fee of €70. Venus Medical Beauty reserves the right to discontinue the Skinsurance programme, change the programme, or the fees at any time. Only doctors perform the resurfacing and injectable procedures, other Skinsurance procedures are performed either by doctors or trained aesthetic practitioners. All Skinsurance programmes are conducted in Dublin clinic only. The Skinsurance programme is not transferrable and payments are non-refundable. Full terms and conditions are available in outline in the Skinsurance contract.

Mesoglow

To hydrate and lift tired skin, or maintain super hydration in healthy skin, Mesoglow gives an instant boost by delivering nutrients and hyaluronic acid directly into the skin. Tiny injections are placed all over the face quickly and precisely using a special device so it is relatively painless. The procedure provides the skin with the age-defying ingredients of expensive creams but guarantees they are delivered into the skin and not just on the skin's surface. The difference is clear!

for payments made
annually!)*

RF skin tightening

Radiofrequency energy combined with gentle suction targets and heats the deepest layer of skin, improving blood supply and stimulating collagen. This lifts and tightens skin and improves skin health by boosting metabolism and stimulating new collagen production.

TCA chemical peel

A chemical peel using TCA is a quick and easy way to remove the outermost layer of skin, revealing clearer and smoother skin underneath. The peeling process takes just 5-7 days. A chemical peel is an ideal kick-start to a programme of skin transformation.
